For the year
2015

PIZZA SALES ANALYSIS

About the dataset

This report summarizes a dataset of 48.62k orders of pizzas Encompassing sales and pizza details information to analysis pizza sales. The Dataset includes a unique ‘ID’ for each orders ,along with categorical features such as ‘order repetition’ , ’category’ , ’pizza size’. Numerical features include ‘order id’ , ’Quantity’ , ’month’ , ’hour’, ’ price’.

SCHEMA

There are 4 tables in the schema ‘order details’ , ‘pizza_types’ , ‘pizzas’ , ‘orders’

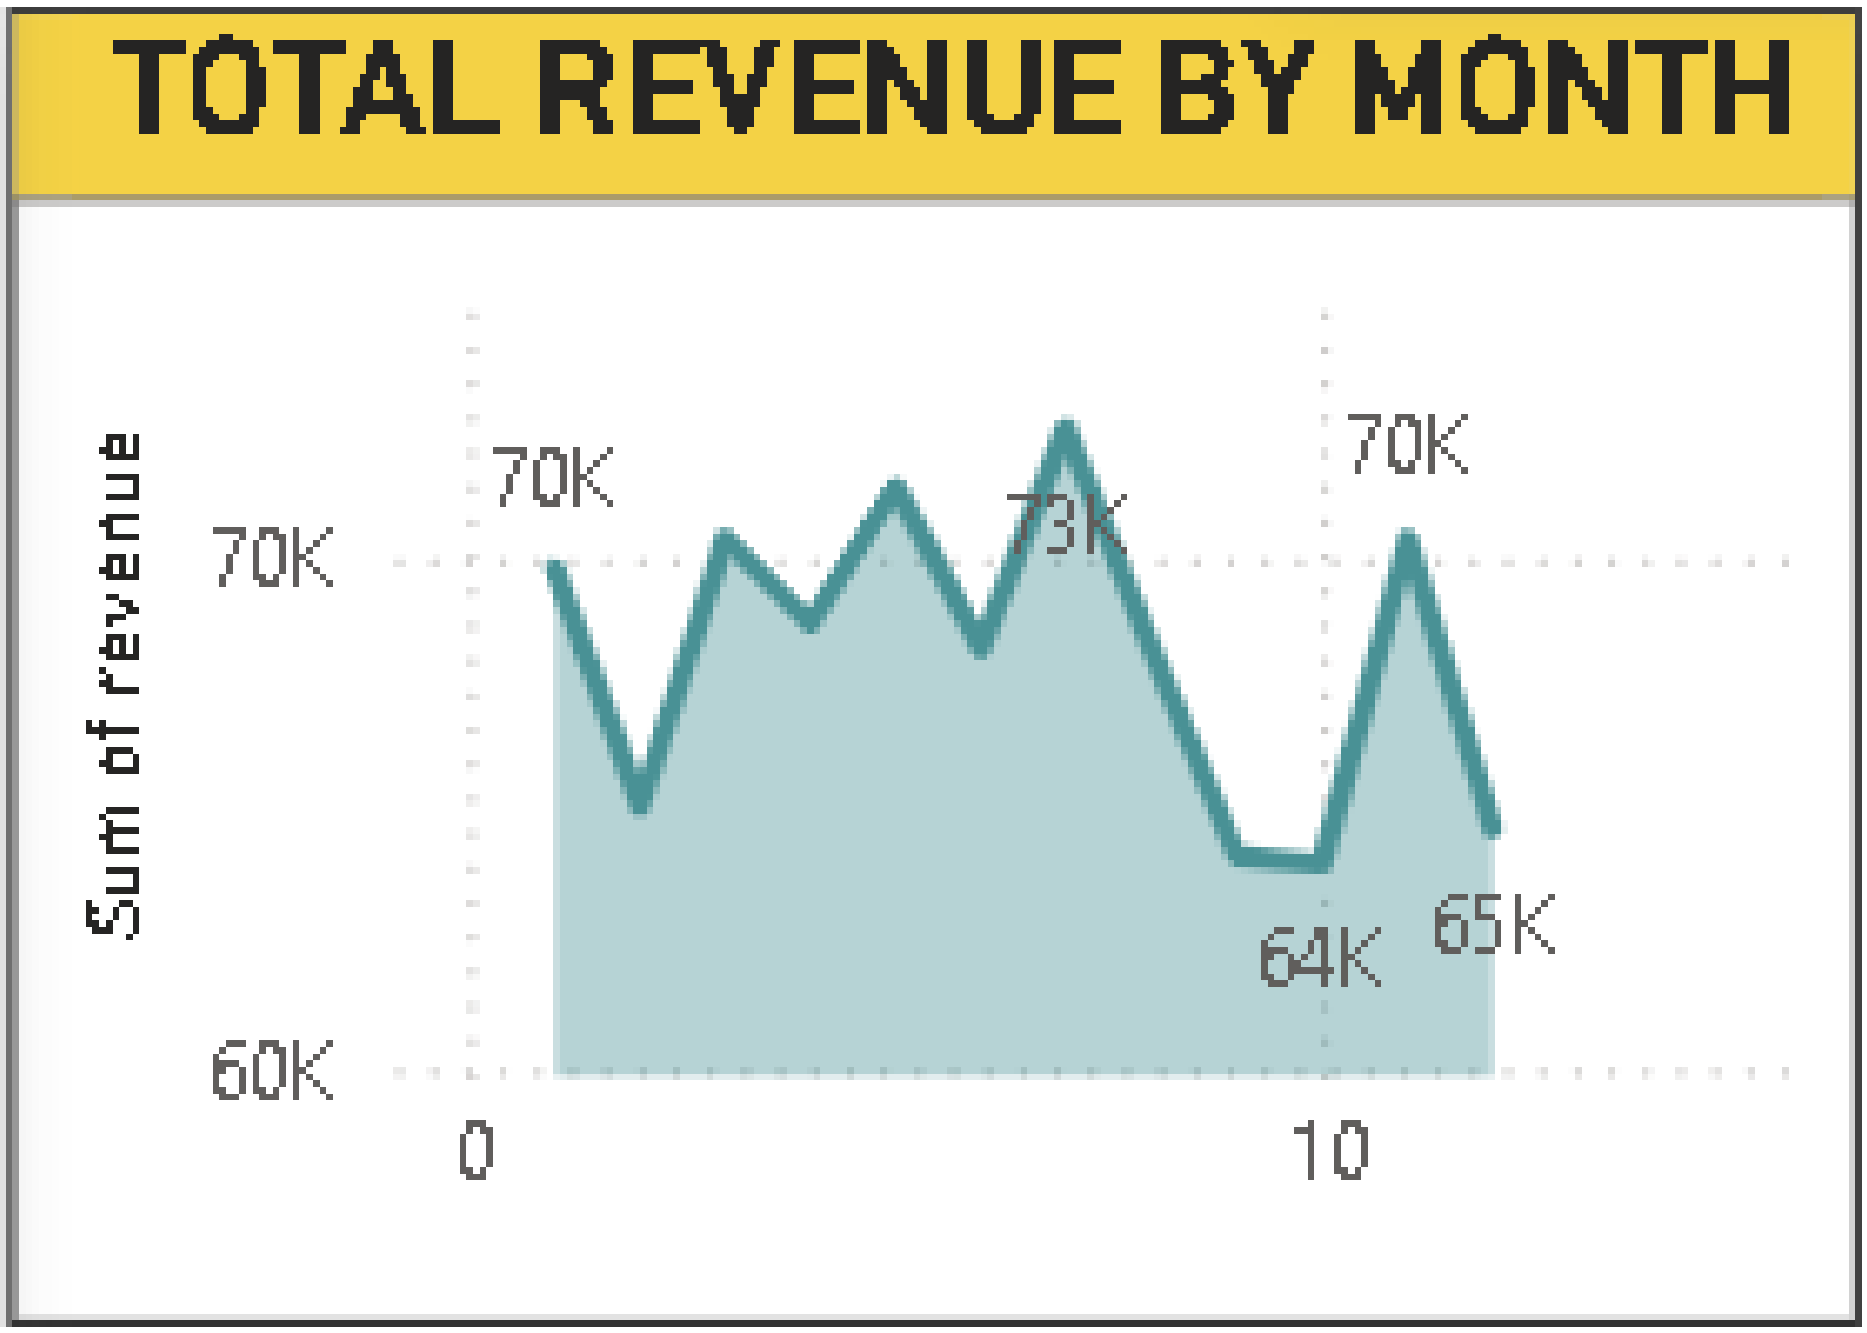
- “order details” : Total number of orders is 48.62k and count of pizza id is 91.
- “pizza types” : Total number of pizzas is 32 and count of category is 4.
- “pizzas” : Percent of Low price pizza is 36% and medium price pizza is 62%.
- “orders” : Period is one year of the data.

Q 1. **Find Total Revenue over the year and Total orders.**

TOTAL ORDERS	DISTINCT ORDERS	TOTAL REVENUE
48.62K	21.35K	817.86K

- Total number of orders is 48.62k .
- Total number of distinct orders is 21.35k.
- Total revenue is 817.86k.

Q 2. **Analyse Revenue by Months over The year.**



SUMMARY :-

- Monthly revenue fluctuates between ~64K and ~75K.
- Higher revenue peaks (~70K–75K) are visible in a few months.
- There is a noticeable dip around the later months (~64K–65K).
- Overall, sales are not consistently increasing, but show seasonal variation.

Winter season :

Monthly revenue peaks are observed during winter months such as November and January, indicating a seasonal increase in pizza sales. Colder weather may contribute to higher at-home dining and increased demand.

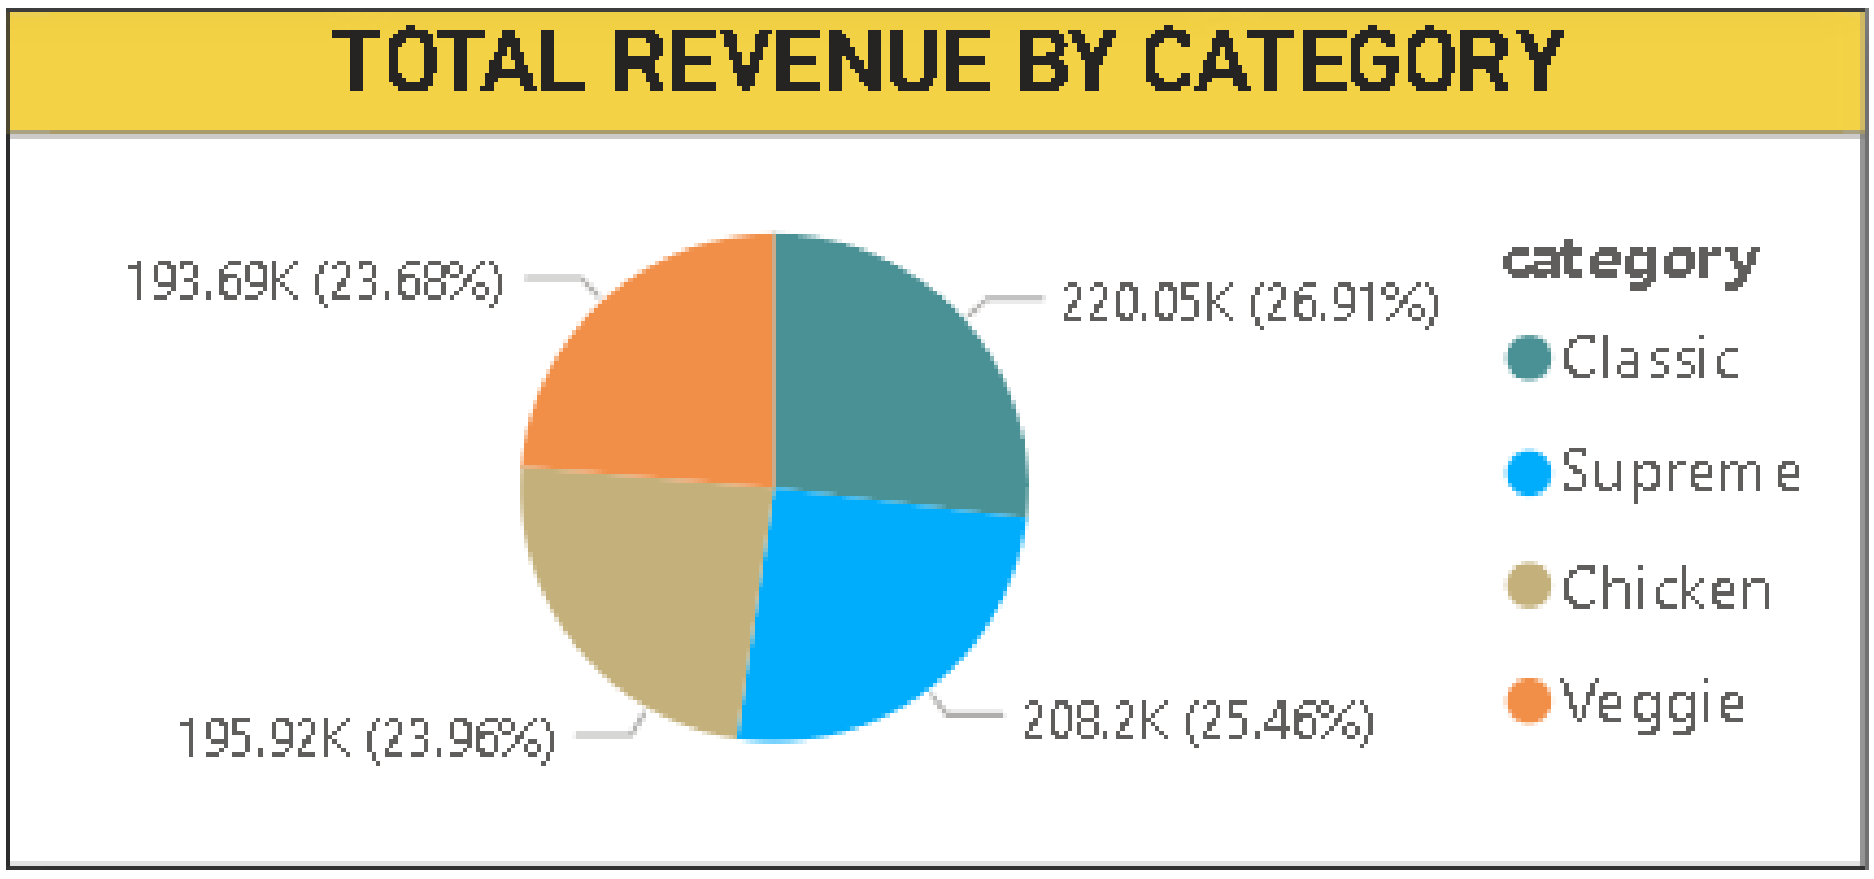
Summer season :

Sales peak around the 6th month (June), indicating strong demand during the early summer period. This suggests that pizza consumption remains high even in warmer months, possibly due to holidays, gatherings, or promotional activities.

Rainy season :

- **Revenue Range:** 64k – 65k during the rainy season, lower than peak months (70k–73k).
- **Trend:** Sales dip during the rainy season, reflecting seasonal slowdown.
- **Insight:** The rainy season impacts revenue, suggesting a need for **seasonal promotions or offers** to boost sales.

Q 3 **Compare category of pizza with revenue and orders.**

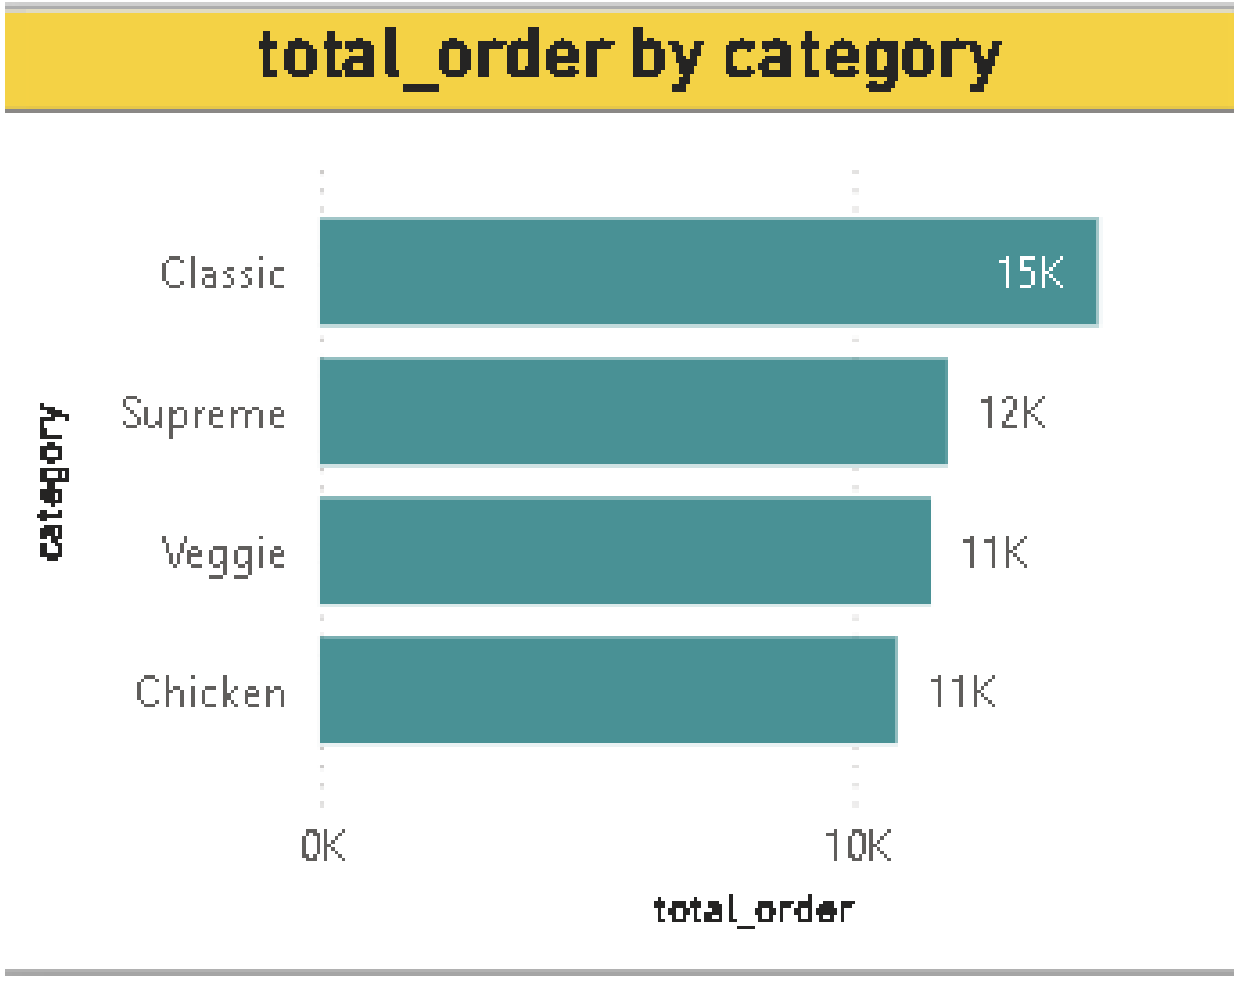


SUMMARY :-

- **Classic**: 220.05K, **26.91%** of total revenue — the highest revenue-generating category.
- **Supreme**: 208.2K, **25.46%** of total revenue — close second.
- **Chicken**: 195.92K, **23.96%** of total revenue.
- **Veggie**: 193.69K, **23.68%** of total revenue — the lowest among the four.

Insight:

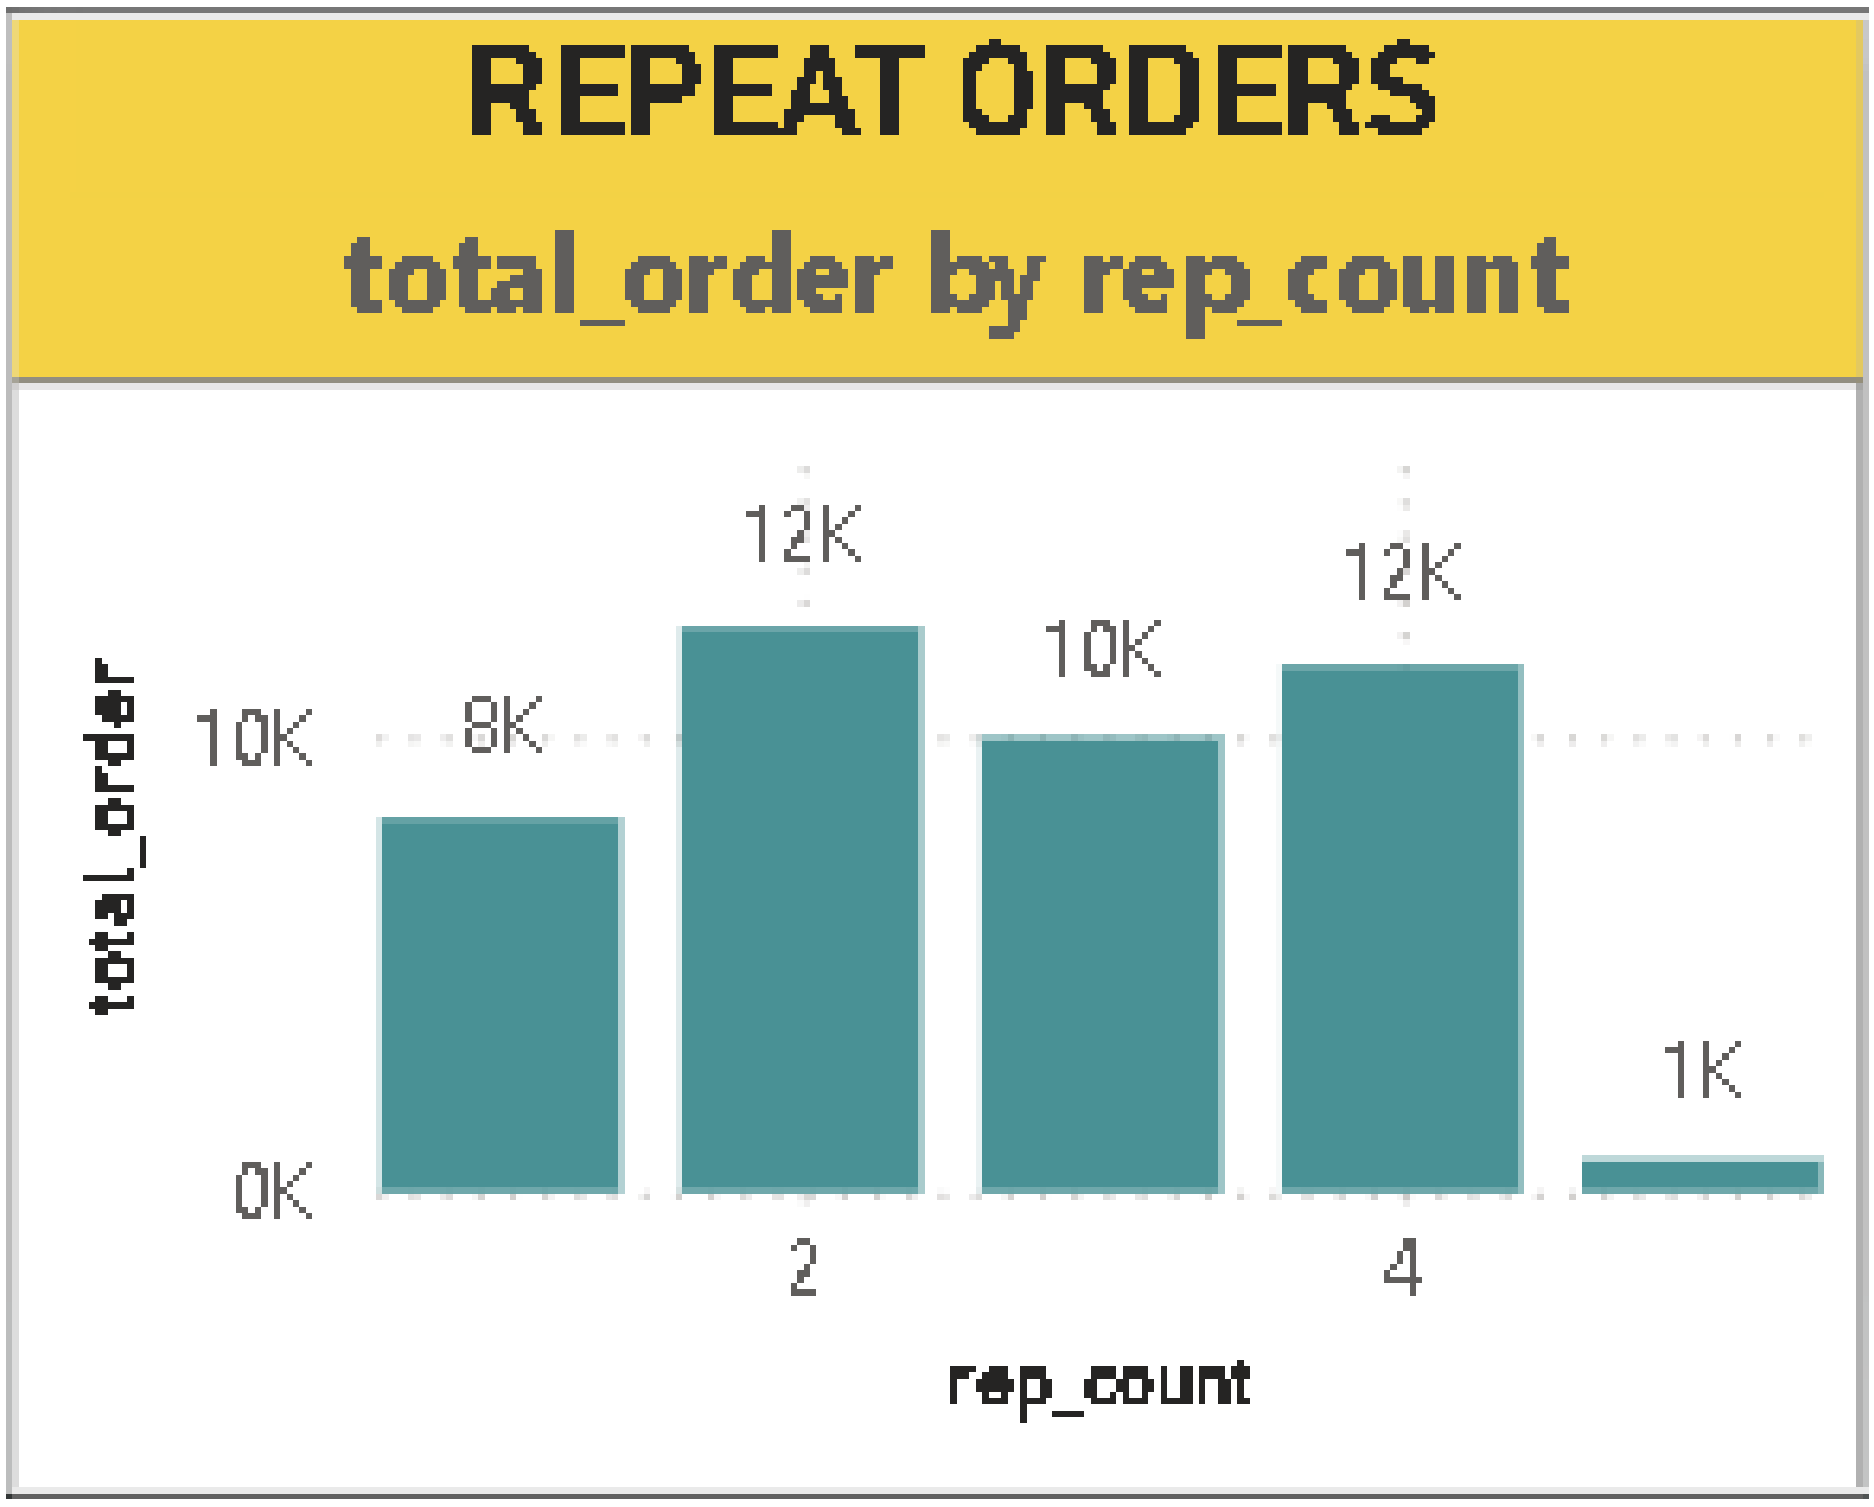
Revenue is fairly balanced across all categories, with Classic leading slightly. The difference between highest (Classic) and lowest (Veggie) is only about 3.23% of total revenue, indicating no single category dominates.



- **Classic:** 15K orders — the most popular category.
- **Supreme:** 12K orders — second highest.
- **Veggie:** 11K orders — slightly below Supreme.
- **Chicken:** 11K orders — similar to Veggie.

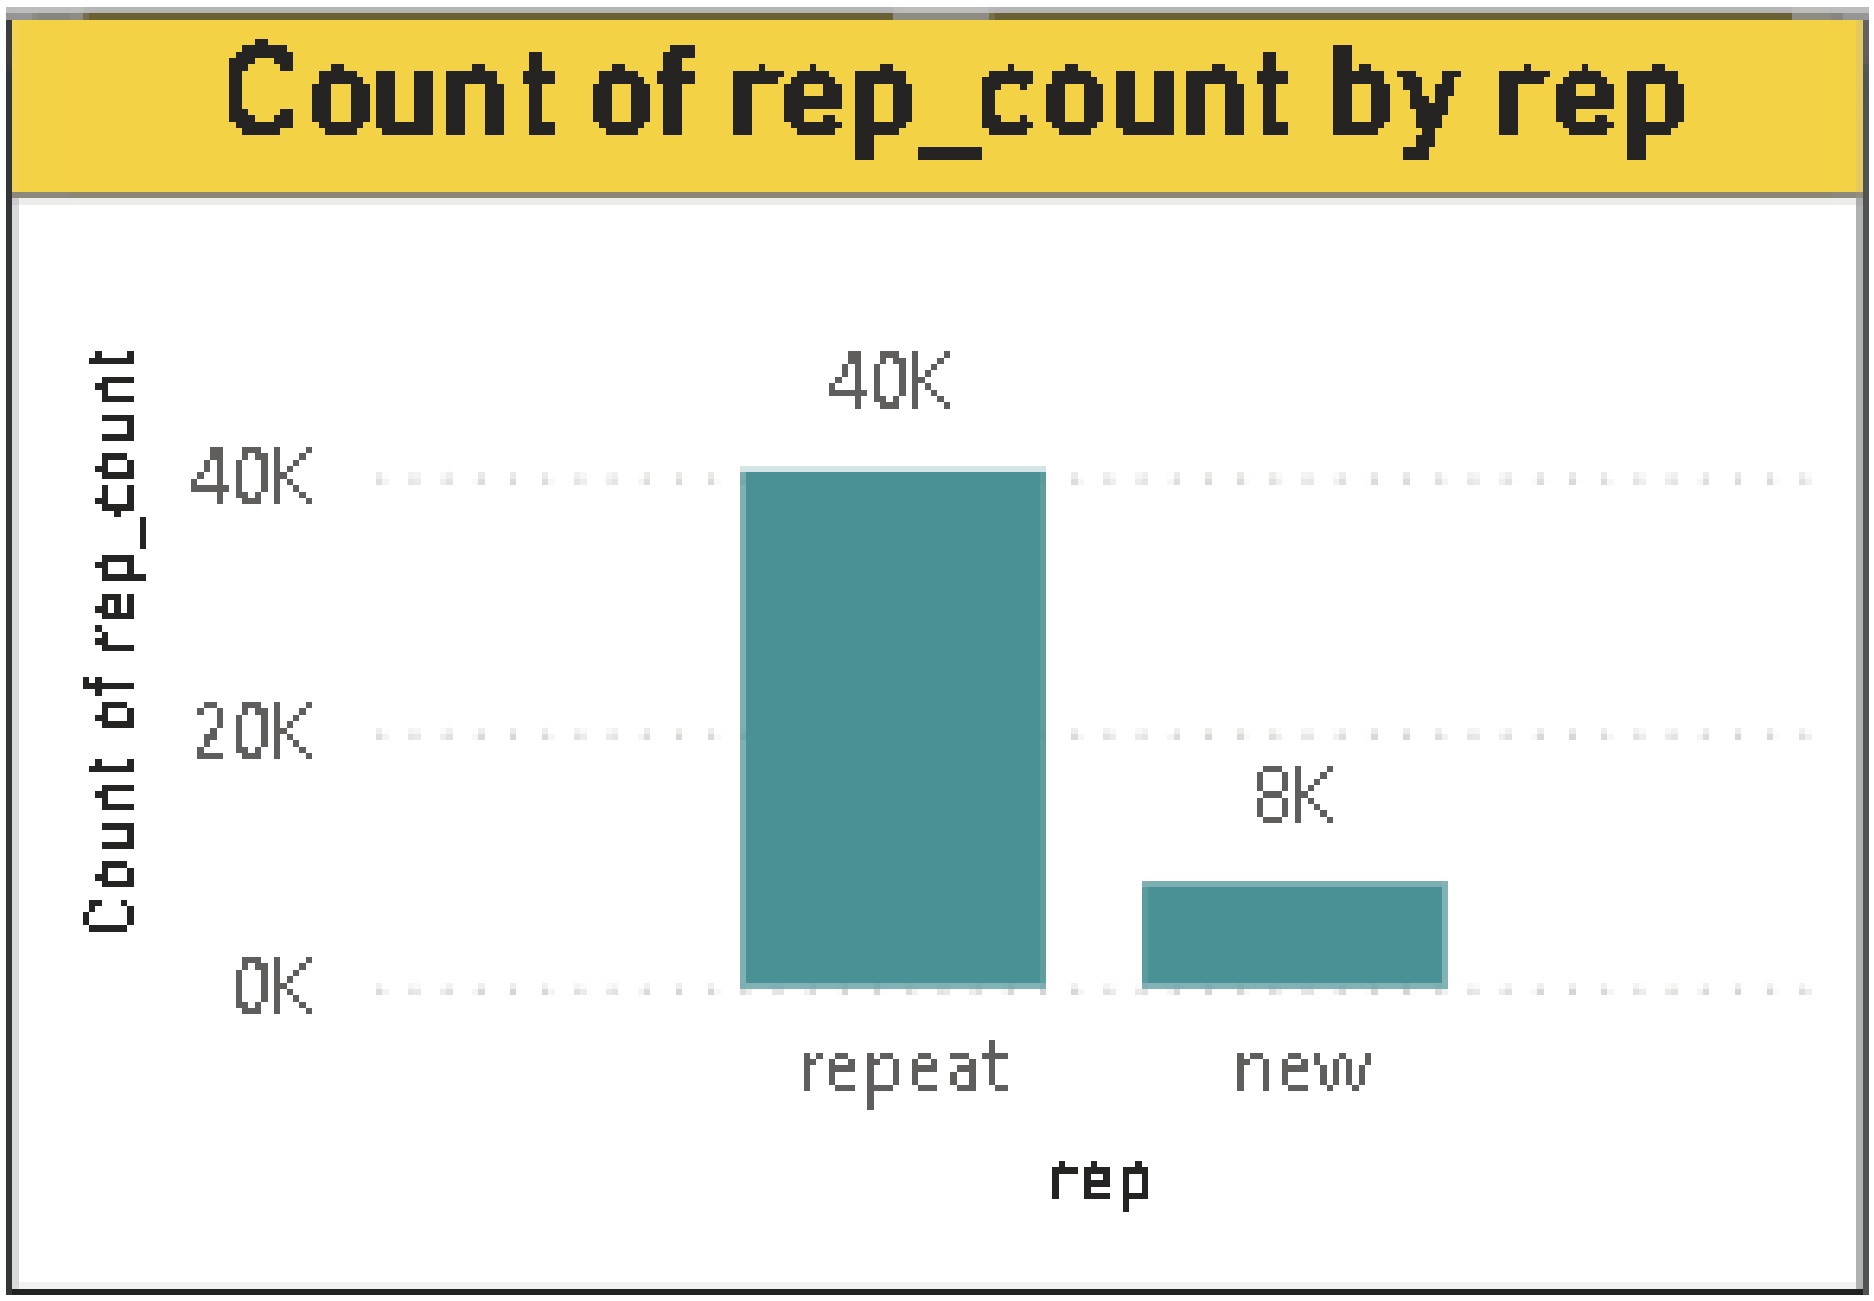
Observation: Classic pizzas dominate the orders, while Veggie and Chicken have similar demand.

Q 4. **Analyse Repetitive Orders .**



summary :

- High repeat orders: rep_count 2 and 4 → 12K total orders
- Medium repeat orders: rep_count 1 and 3 → 10K total orders
- Low repeat orders: rep_count 5 → 1K total orders



Pizza Sales Orders Summary :

- The chart shows the number of pizza orders categorized as repeat and new.
- **Repeat orders:** 40,000
- **New orders:** 8,000
- **Insight:** Most customers are returning customers, indicating strong loyalty and that they enjoy the pizza.
- Repeat orders account for 83% of all orders, highlighting the popularity and satisfaction among existing customers.

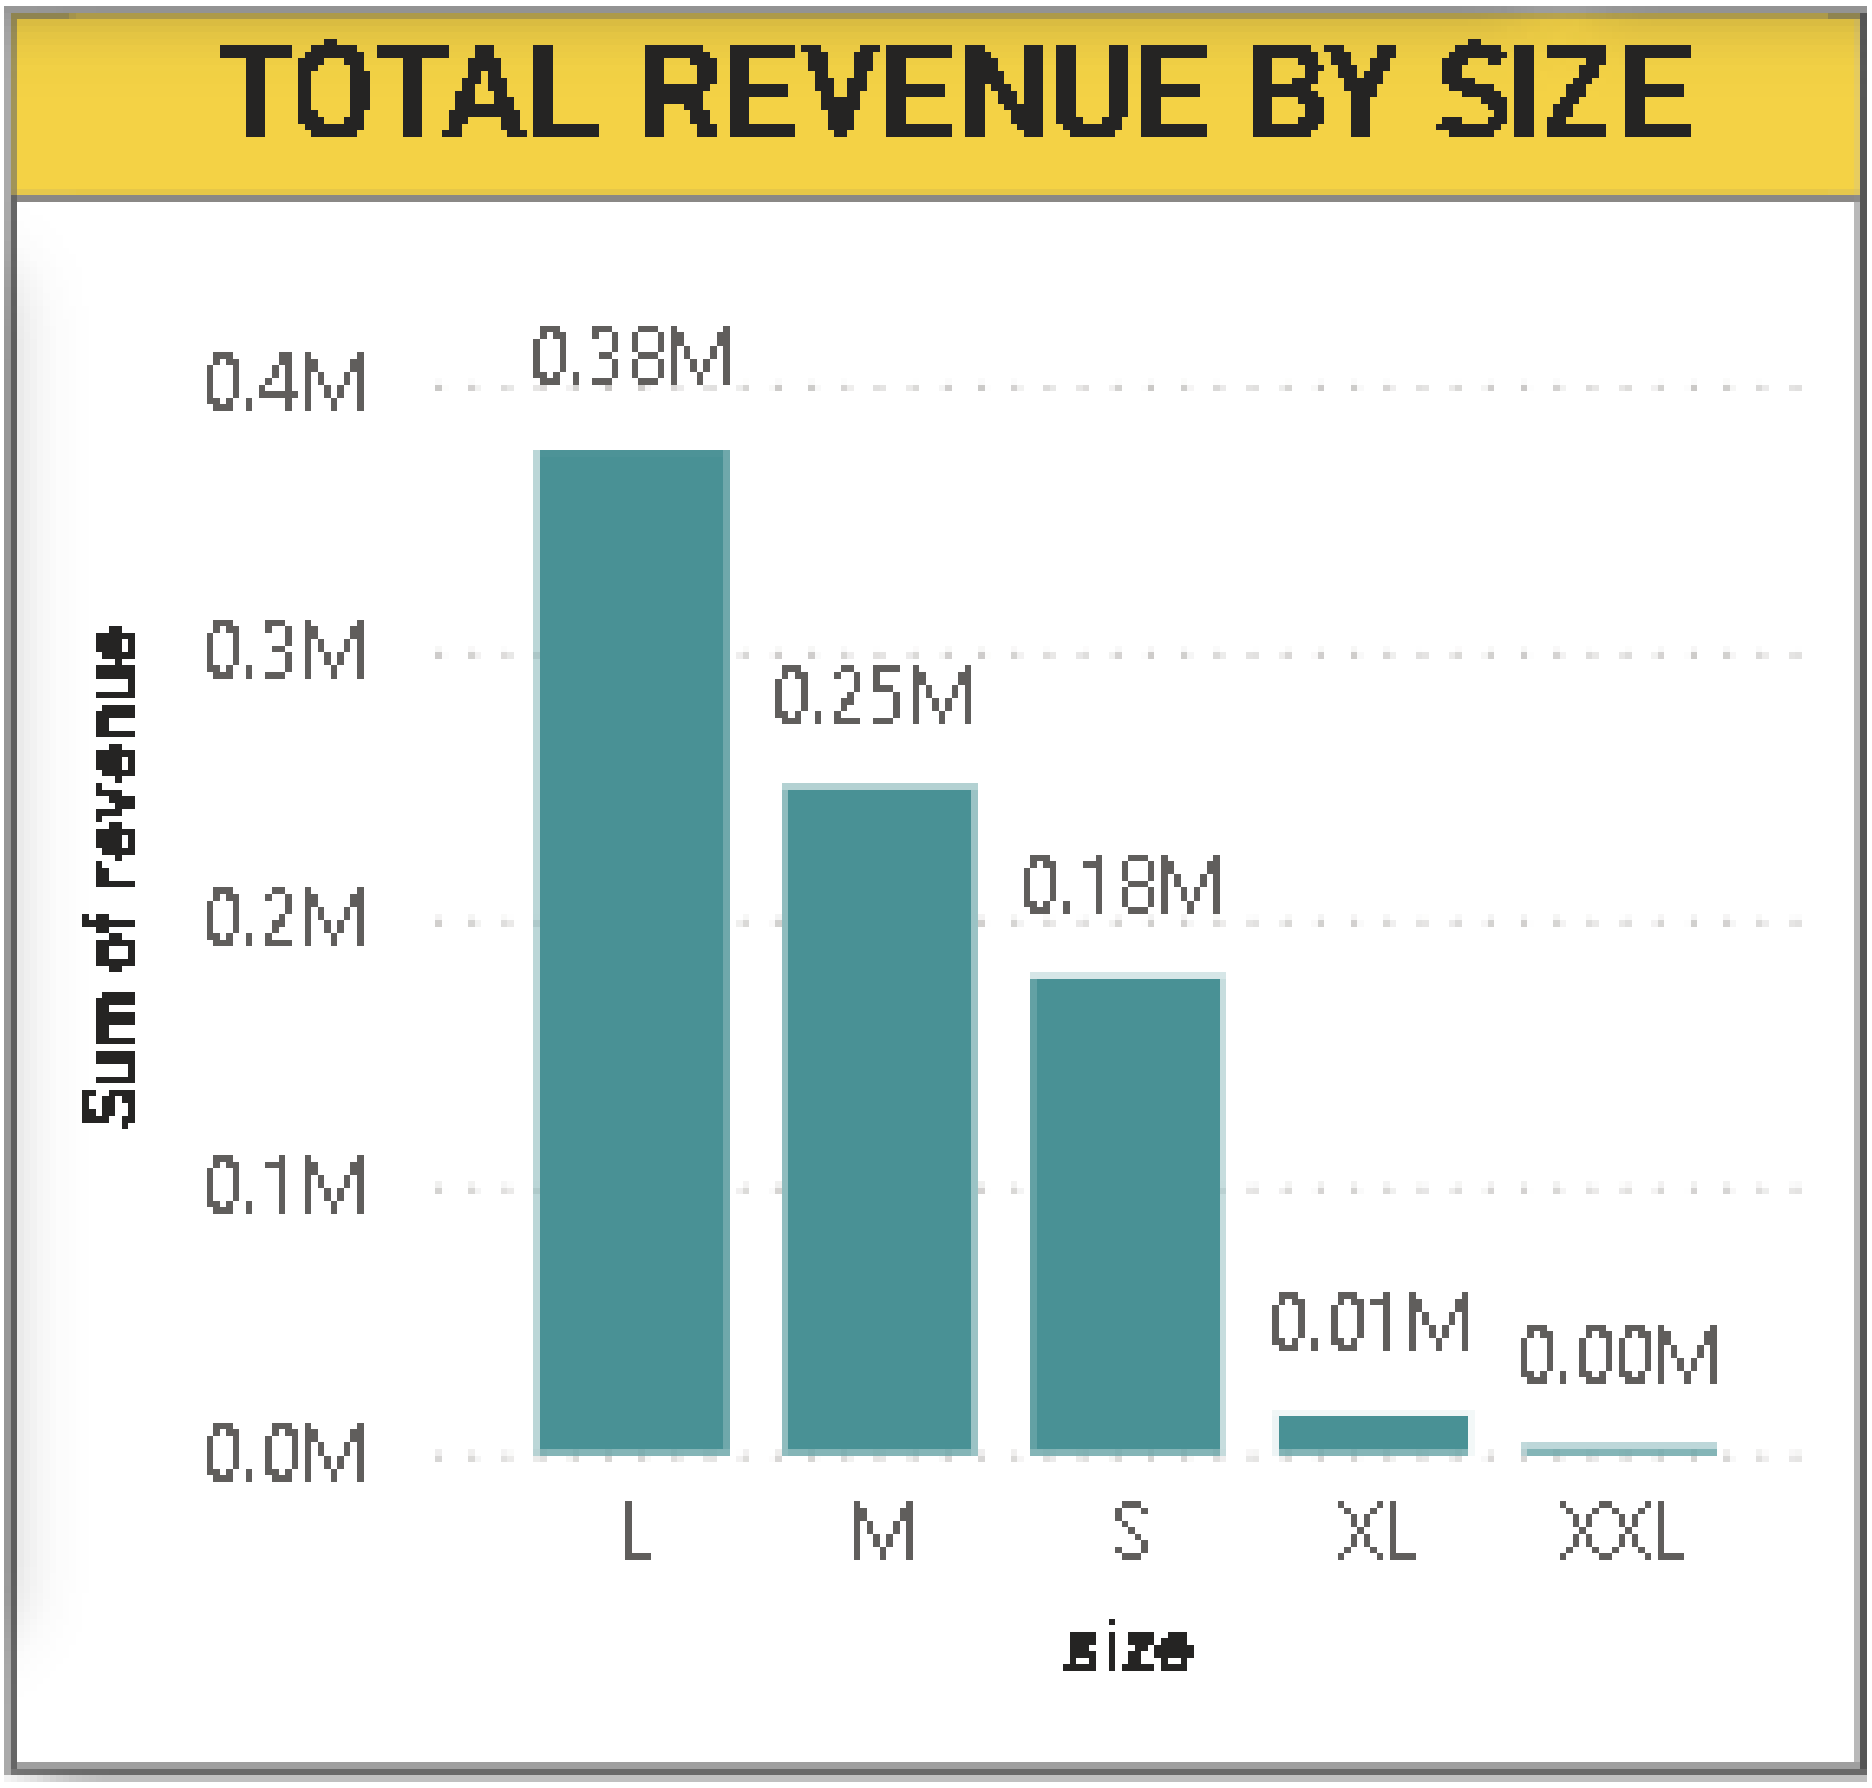
Q 5 **Find Best selling pizza and Compare Revenue with category .**

TOP 5 BEST SELLING PIZZAS

name	Sum of revenue
The Thai Chicken Pizza	43,434.25
The Barbecue Chicken Pizza	42,768.00
The California Chicken Pizza	41,409.50
The Classic Deluxe Pizza	38,180.50
The Spicy Italian Pizza	34,831.25
Total	**200,623.50**

Key Takeaways:

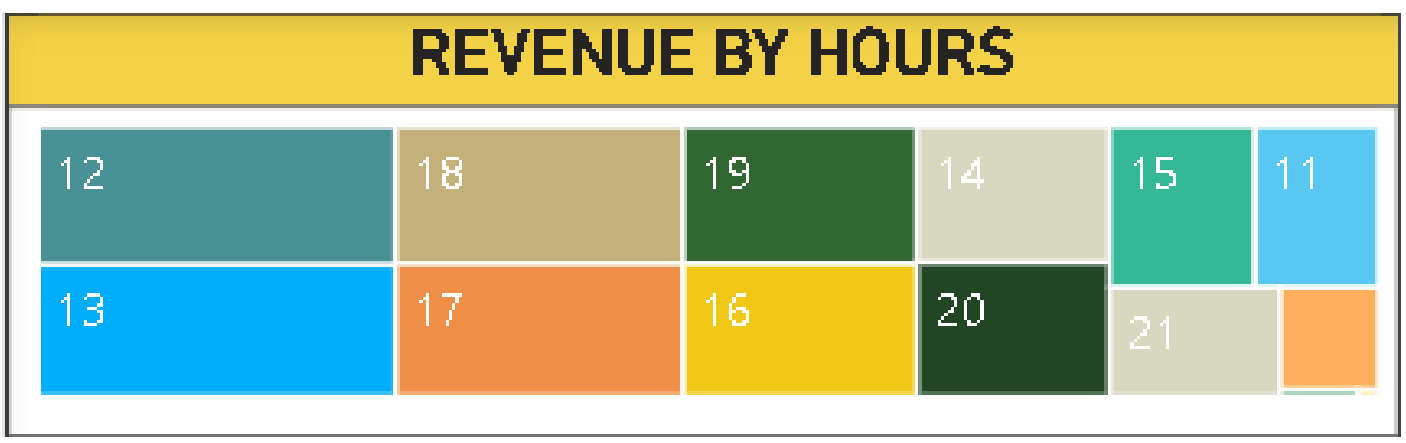
- **Chicken pizzas dominate** the top three spots, with "The Thai Chicken Pizza" generating the highest revenue.
- The difference in revenue between the top-selling and fifth-selling pizza is significant (43,434.25 - 34,831.25 = 8,603.00).



Key Observations:

- **Large (L) pizzas are the top revenue generators** at 38m%.
- **Medium (M) and Small (S) sizes** contribute 25m% and 18m% respectively.
- Revenue drops sharply for the specialty sizes, with **XL generating only 1M%** and **XXL generating no revenue** (specifically,0M%).

Q 6. **Find the time of most orders placed .**



Summary :

Revenue generation is heavily concentrated around the **lunch rush (12 PM - 1 PM)** and the **dinner rush (5 PM - 7 PM)**, with the single highest revenue hour being **12 PM**. This confirms a strong revenue stream during traditional meal times.

Key Insights from Pizza Sales Analysis

- Revenue exhibits seasonal trends, peaking during winter months while remaining relatively stable overall, **indicating consistent demand without aggressive growth fluctuations.**
- **Classic pizzas lead in both revenue and order volume**, while other categories contribute evenly, reflecting a balanced product mix.
- Chicken-based pizzas dominate top sellers, with ***The Thai Chicken Pizza* generating the highest revenue**, highlighting strong customer preference for premium chicken variants.
- **Large-sized pizzas account for the majority of revenue**, whereas XL and XXL sizes contribute minimally, suggesting limited demand for oversized portions.
- Repeat order analysis shows that most customers place fewer than five repeat orders, **indicating an opportunity to increase customer retention through targeted discounts**, loyalty offers, or bundle deals for low-frequency repeat customers.
- **Orders and revenue peak during lunch (12–1 PM) and dinner hours (5–7 PM), with 12 PM as the top-performing hour, supporting optimized staffing and promotional timing.**
- **Overall insights enable data-driven decisions in promotions, inventory planning, workforce scheduling, and customer retention strategies, especially by incentivizing low-repeat customers.**
